347-617-5200 | Queens, NY 11434 | Udipto2000@gmail.com | [linkedin.com/in/udipto2000/](https://www.linkedin.com/in/udipto2000/) | <https://udipto2000.github.io/portfolio/>

Strategically Adaptive and Service-Oriented Technical Support/Cybersecurity Professional with demonstrated, growing expertise in the area of endpoint security operations, enterprise devices, and administration and networks. Recognized for providing excellent technical support, identifying the root cause of/providing solutions to difficult technical problems, and sustaining the security posture of the organization. Competently skilled in managing and configuring enterprise device buildouts and systems, analyzing vulnerabilities, managing incident response, and supporting cross-functionally for infrastructures to reduce downtime and improve end-user functionality.

TECHNICAL SKILLS

Software: Windows (10/11, Server), Linux (Ubuntu), Android, MacOS

Security Tools: Cellebrite Mobile Forensics, Splunk SIEM, Windows Defender, Endpoint Protection Platforms, Endpoint Detection Platforms

Programming Languages: Python, JavaScript, HTML5, CSS, R

Network & Infrastructure: TCP/IP, DNS, DHCP, VPN Configuration, Wireless Security, Network Troubleshooting

Forensics & Analysis: Digital Evidence Extraction (Autopsy), Chain of Custody Management, Incident Response, Vulnerability Assessment, NetworkMiner, CCleaner

Productivity Tools: Microsoft Office Suite, Google Workspace, Documentation & Reporting, JIRA

AI Tools: Claude, Perplexity, Google Gemini, ChatGPT

CERTIFICATIONS

CompTIA Cybersecurity Analyst (CySA+) | Per Scholas | New York, NY

February 2025

Splunk Core Certified User | Per Scholas | New York, NY

February 2025

Google Cybersecurity | Coursera | New York, NY

July 2024

Certificate of Achievement in Cybersecurity (Codepath) | John Jay College | New York, NY

April 2022

EDUCATION

John Jay College of Criminal Justice | Manhattan, New York

May 2024

Master's in Digital Forensics and Cybersecurity | GPA: 3.34

John Jay College of Criminal Justice | Manhattan, New York

May 2022

Bachelor's in Computer Science and Information Security | GPA: 3.34 | Dean's List: Fall 2020, Spring 2022

PROFESSIONAL EXPERIENCE

New York City Department of Education, New York, NY - Field Technician Specialist

March 2025 - Present

- Handpicked to support endpoint security and device lifecycle across NYC public schools. Streamline technical workflows for a monthly hardware throughput of ~50 Chromebooks, 12 Lenovo P3/M70Q towers, 25 Lenovo L14s/Yogas, and 3 Lexmark printers, alongside ATS printers (Lexmark CS722) to secure against unauthorized access.
- Reduced provisioning time from 10 minutes to 3 minutes per Chromebook, achieving a 70% efficiency gain by facilitating a 500 Chromebook provisioning project with 12–15 team members and optimizing a USB-C-to-Ethernet workflow.
- Assured proper configuration of every device, charger, and adapter by coordinating asset tracking and full configuration delivery for a 1,000-MacBook deployment with 17 field technicians and 3 supervisors.
- Maintained a 95% success rate in device configuration and compliance with DOE network standards by performing root cause analysis of hardware failures through targeted hard resets and driver reinstallation, minimizing downtime.

Commonpoint Queens, New York, NY - Child and Youth Worker

July 2023 - June 2024

- Appointed to deliver technical support and academic enrichment programs for 15+ middle school students, integrating educational technology solutions, including Promethean Smartboards and Chromebooks.
- Achieved a 85% pass rate among math-tutored 6th–8th graders on New York State Exams, with students scoring 3s and 4s, directly tied to structured, outcome-focused academic intervention.
- Improved foundational digital literacy using Microsoft Office, equipping students with workplace-ready computer skills and modern technical systems.

Department of Justice, New York, NY - Intern

June 2022 - August 2022

- Challenged to conduct mobile digital forensics investigations supporting federal cases involving cyber fraud, cybercrime, and cyber terrorism through utilizing the Cellebrite mobile forensics platform to perform extractions on 15 smartphones and 5–6 Nokia devices to recover metadata, media, documents, and audio files critical to active investigations.
- Strengthened investigative outcomes by leveraging Central OpsNet (reverse IP lookup) to build digital evidence trails supporting organized crime prosecutions.
- Contributed to an estimated 5% improvement in threat management and vulnerability assessment efficiency through streamlined evidence processing workflows.

CORE COMPETENCIES

Technical Support Operations | IT Help Desk Support | Endpoint Detection & Response | System Troubleshooting & Root Cause Analysis | Cross-Platform System Administration | Incident Response & Remediation | Vulnerability Assessment & Management | Network Security & Infrastructure Support | Digital Forensics Investigation | Security Operations Center Analysis | Technical Documentation
